Office Storage Solutions

Strata 2. Bringing a design sensibility to flexibility.

In today's ever-changing economic environment, one certainty is that workplaces change too. That's why the stylish Strata 2 range of cabinets has been designed to evolve effortlessly along with your needs.

Design in harmony.

The quality that lends the Strata 2 range its impressive flexibility is consistency. Aesthetics and dimensions are repeated across the range to create sleek designs that mix and match perfectly.

Their compact design, with slimline tops and floor plinths, maximises storage capacity and all cabinets are constructed from steel to guarantee strength and improve security. And a hard-wearing powder coated finish means they'll stay looking good for years to come.

Each cabinet is fitted with individually adjustable levelling feet, making it simple to align them when banked together or when combining with other furniture.

Given their clean, simple lines, the cabinets can also define layouts and be used as an alternative to screens.

A smarter choice for the environment.

All cabinets in the Strata 2 range are GECA certified, meaning they've been independently tested to ensure they meet strict environmental standards.

The packaging your cabinets arrive in won't only help protect your purchase. It's made from 100% recycled materials to help minimise impact on the environment as well. Dexion also has a product stewardship program available to help businesses reduce their carbon footprint.

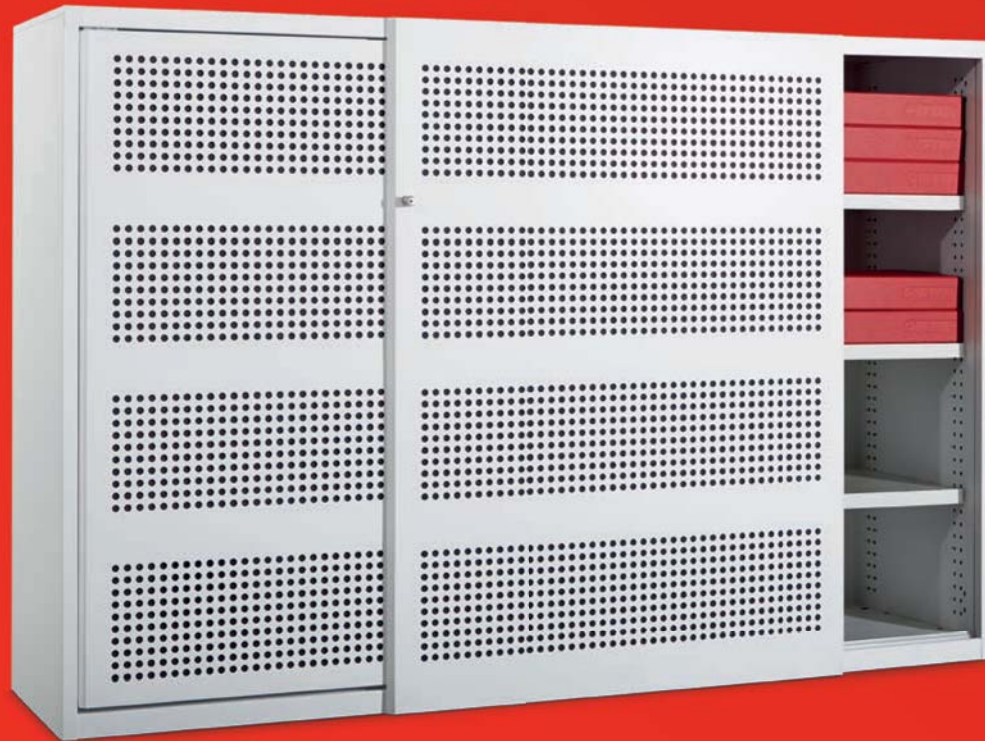

Security with style.

In every office, there are items and documents that need to be kept under lock and key. The Strata 2 performs this task brilliantly with a removable barrel locking system that offers 3,000 key combinations and master keys. All cabinets feature a secure locking system providing added security to stored contents.

The keys are clever, too, with a folding design that helps them to remain unobtrusive if left in the lock. They also help protect against germs because each Microban key is 99% antibacterial.

The choice of doors is wide open.

Offering complete flexibility for ever changing work places. Cabinets can be easily converted to a different door type should your requirements change.

Sliding door

Tambour door

Please refer to our website, for cabinet specification sheets.

Swing door

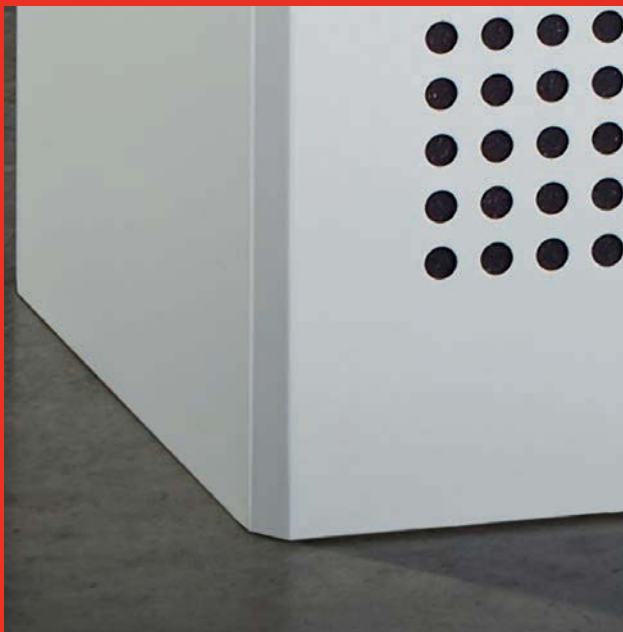

No door (Bookcase)

Reduces noise as it reduces clutter.

Stylish
& secure.

The bevelled edge adds to the sleek streamlined design. Doors perfectly align when either side is open.

Perforated doors with acoustic sound absorption panels create a modern aesthetic and enhanced sound absorption.

A clearly clever choice.

To hide,
just slide.

Equipped with signature handle design, the cabinet is available in a range of colours. The door slats are ABS as standard and available in a range of colours, including translucent.

Secure Pincer Locking System operates two lock latches with separate anchor points in the door.

The cabinet boasts innovative full height magnetic strips on the door-posts to enable tight, secure closure, and a smooth finish when doors are closed. Dual point locking further ensures the secure storage of contents.

Get into the swing of storage.

An open and
shut case.

Lockable doors provide extra security for sensitive documents.

With doors, swing door cabinet.

Without doors, bookcase.

Add some greenery to your scenery.

Grow your
space.

Perforated planter, provides acoustic dampening.

Plain planter, designed to achieve maximum strength and rigidity.

The Strata 2 planters have been designed to work together with the entire suite of Strata 2 cabinets. The modular design accommodates all plant types, and ensures easy maintenance and care.
