Introduction

The Freetrack 2 Longspan Compactus is one of Dexion's most versatile storage system. With Ultima Longspan shelving mounted on Freetrack 2 Compactus track and runner system this compactus is perfect for office storage of archives or bulky items. The track on this compactus does not require floor fixing, and the low weight of the Freetrack system keeps floor loads to a minimum.

Features

- Versatile storage solution
- Designed for large bulkier items
- Low profile track incorporates our patented pivoting ramps that follow the floor contour to reduce trip hazards and improve trolley and wheelchair access
- Universal runner design allows various double-sided bay combinations
- Crinlon steel strips within the track provide a hard wearing surface for the load wheels of the runner
- A lighter weight system reduces operator strain and loads imposed on the floor
- Tracks are not fixed to the floor which allows easy relocation or reconfiguration, and eliminates any damage to floor coverings
- Track and runner combinations add only 65mm to the overall shelving height
